QUALITY MANUFACTURING BACKED BY WARRANTIES AND SERVICE

RELIABILITY AND LONG LIFE

One of the most critical components of a packaged gas/electric unit is the heat exchanger. Our patented, aluminized-steel tubular heat exchangers provide incredible durability and heating capacity. Additionally, the KLIMAIRE 13 SEER Packaged Gas/Electric Unit utilizes a reliable Direct-Spark Ignition system and integrated

controls with on-board diagnostics, plus a combination redundant gas valve and regulator for further safety and reliability.

Our 13 SEER Packaged Gas/Electric unit also boasts a high-performance, energy-efficient compressor, which operates in tandem with our high-efficiency coil. The coil is made of refrigeration-grade copper tubing and aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively while saving you money on your energy bills!
